

SUMMARY	Belmont Accounting and Entrepreneurship student with hands-on operating experience across real estate and retail ventures. Built and managed processes in leasing, compliance, and day-to-day operations. Excel Expert Certified; completed MIT certificate in data science and machine learning.		
EDUCATION	Belmont University, Nashville, TN	Anticipated Graduation December 2026	
	Bachelor of Business Administration in Accounting and Entrepreneurship	GPA: 3.9	
	Massachusetts Institute of Technology (MIT)	Issued March 2025	
	Certificate in Data Science and Machine Learning: Making Data-Driven Decisions		
EXPERIENCE	Property Management	Nashville, TN	
	Family Rental Portfolio	2019 – July 2025	
	- Managed day-to-day operations for a family-owned five-unit rental portfolio, including leasing coordination, tenant communication, and issue resolution. - Led unit turnovers end-to-end by scoping repairs, comparing bids, scheduling contractors, and confirming readiness for move-in. - Operated one unit as an Airbnb short-term rental, including furnishing, guest messaging, and turnover coordination; maintained a 4.91 rating and Superhost status.		
	Founder & Operator	Nashville, TN	
	Honky Tonk CBD – Age-Verified Retail Venture	January – December 2024	
	- Launched and operated an age-verified vending business, securing placement, managing suppliers/service partners, and running daily operations. - Built an age-verification workflow and wrote clear operating procedures and exception steps to support compliance and reduce risk. - Monitored live inventory and sales through a connected vending platform, exported data to Excel, and used it to track performance, identify trends, and plan reorders. - Assessed Tennessee regulatory changes and made an early shutdown decision to avoid rising compliance risk and preserve capital.		
PROJECTS	Internal Controls Strategy Simulation — Elected Team Lead		
	- Elected team lead for a time-boxed, multi-round controls simulation; coordinated the team and owned final decisions and deliverables under tight deadlines. - Built a risk inventory and impact-likelihood heat map; selected controls from a 105-option library under financial constraints. - Documented simulation outcomes and translated them into a final deck with control recommendations, rationale, and residual risk.		
	Product Strategy Portfolio — Peloton Youth Market Expansion		
	- Led the research-heavy situation analysis, synthesizing market, competitor, and customer insights into clear objectives and strategic direction. - Developed a youth-market expansion concept, defining the target segment, positioning, and value proposition. - Built key sections of the final portfolio and helped integrate the work into one coherent strategy; selected by the professor as a model example for future classes.		
	ERP Transaction Cycles Project — NetSuite		
	- Executed core ERP cycles in Oracle NetSuite (Order-to-Cash, Procure-to-Pay, Record-to-Report). - Traced transactions through the system to see how operational activity becomes accounting outputs. - Documented workflow steps and key control points (approvals, completeness/accuracy checks, segregation of duties).		
SKILLS	- Excel (Expert Certified) - NetSuite ERP - Data Analysis & Reporting - Operations Coordination - Internal Controls & Risk Assessment
